Project Name: Standard Laptop Procurement Automation using ServiceNow Flow

Designer

Maximum Marks: 2 Marks

CUSTOMER JOURNEY MAP

The customer journey for the Standard Laptop Procurement process is mapped stage-by-stage to understand the user's actions, interactions, thoughts, feelings, process ownership, and opportunities for improvement.

Phase of Journey	Stage 1	Stage 2	Stage 3
Stage	Request Laptop	Request Approval	Laptop Configuration
Actions	Customer submits a Standard Laptop request through the Service Catalog.	Customer's request goes through the approval process and the request is approved.	Customer waits while the Hardware team processes the approved request and configures the laptop.
Touchpoint	Service Catalog and Standard Laptop catalog item.	Request Number, Approvers and Requested Item.	Catalog Task and Hardware assignment group.
Customer Thought	"I need a Standard Laptop for my work."	"Will my request be approved and processed?"	"When will my laptop configuration be completed?"
Customer Feeling	Needs a laptop and expects the request to be processed smoothly.	Waiting for approval and further processing.	Expects the approved request to move to the Hardware team without unnecessary delay.
Process Ownership	Service Catalog / Requester	Approval process / Approver	Hardware team / Flow Designer
Opportunities	Provide a simple and clear Standard	Automate the process after approval to avoid	Automatically create and assign the Catalog Task to

Phase of Journey	Stage 1	Stage 2	Stage 3
	Laptop request process.	unnecessary manual handling.	the Hardware team for consistent processing.

STAGE 1 – REQUEST LAPTOP

Actions

The customer submits a **Standard Laptop** request through the Service Catalog.

Touchpoint

The customer interacts with the **Service Catalog** and selects the **Standard Laptop** catalog item.

Customer Thought

“I need a Standard Laptop for my work.”

Customer Feeling

The customer expects the laptop request to be submitted easily and processed smoothly.

Process Ownership

The **Service Catalog / Requester** is responsible for initiating the request.

Opportunities

The request process can be kept simple and clear so that the customer can easily submit a Standard Laptop request.

STAGE 2 – REQUEST APPROVAL

Actions

The submitted Standard Laptop request goes through the approval process. The request is reviewed and approved.

Touchpoint

The customer interacts with the **Request Number, Approvers, and Requested Item.**

Customer Thought

“Will my request be approved and processed?”

Customer Feeling

The customer is waiting for the approval and expects the request to move forward after approval.

Process Ownership

The **Approval Process / Approver** is responsible for reviewing and approving the request.

Opportunities

The process can be automated after approval so that the approved request can move to the next stage without unnecessary manual intervention.

STAGE 3 – LAPTOP CONFIGURATION

Actions

After approval, the required Catalog Task is created and assigned to the Hardware team. The Hardware team processes the task for laptop configuration.

Touchpoint

The customer journey interacts with the **Catalog Task** and **Hardware assignment group**.

Customer Thought

“When will my laptop configuration be completed?”

Customer Feeling

The customer expects the approved request to be processed without unnecessary delay.

Process Ownership

The **Hardware team and Flow Designer** are responsible for this stage.

Opportunities

The Flow can automatically create the Catalog Task and assign it to the **Hardware** group after approval. This reduces manual task creation and assignment and provides a more consistent workflow.

CUSTOMER JOURNEY SUMMARY

The Standard Laptop customer journey begins when the user submits a request through the **Service Catalog**. The request then moves through the **approval process**. Once the request is approved, the ServiceNow Flow automatically creates a **Catalog Task** and assigns it to the **Hardware** group for laptop configuration.

The automation connects the different stages of the customer journey and helps reduce manual effort, delays, and inconsistencies in the Standard Laptop procurement process. This follows the template's focus on mapping customer actions, touchpoints, thoughts, feelings, ownership, and improvement opportunities at each stage.
