Project Title: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 5 Marks

Project Proposal (Proposed Solution) Report

The proposal aims to streamline the IT hardware procurement process by automating the processing of Standard Laptop requests using **ServiceNow Flow Designer**. The solution addresses the manual effort involved in creating and assigning Catalog Tasks after request approval. It provides a consistent workflow that improves task visibility, reduces delays, and minimizes manual errors.

Project Overview

Objective

The primary objective is to automate the Standard Laptop procurement workflow by using ServiceNow Flow Designer to create a Catalog Task automatically after the laptop request is approved and assign the task to the Hardware team.

Scope

The project covers the processing of Standard Laptop requests through the ServiceNow Service Catalog, approval of the request, automatic creation of a Catalog Task, and assignment of the task to the Hardware team for laptop configuration.

Problem Statement

Description

The existing Standard Laptop procurement process may require manual creation and assignment of Catalog Tasks after a request is approved. This manual process can require additional effort and may cause delays or errors in task processing.

Impact

Automating this process can reduce manual task creation and assignment, improve task visibility, and ensure that approved Standard Laptop requests are consistently transferred to the Hardware team for further processing.

Proposed Solution

Approach

The proposed solution uses **ServiceNow Flow Designer** to automate the Standard Laptop procurement workflow. When a Standard Laptop request is approved, the

Flow automatically creates a Catalog Task with the required details and assigns it to the Hardware team.

Key Features

- Automated processing of Standard Laptop requests.
- Automatic creation of a Catalog Task after approval.
- Automatic assignment of the Catalog Task to the **Hardware** team.
- Integration of Service Catalog, Requested Items, Approvals, Flow Designer, and Catalog Tasks.
- Reduced manual task creation and assignment.
- Improved visibility and consistency in the procurement workflow.

Resource Requirements

Resource Type	Description	Specification / Allocation
Platform	ServiceNow development environment	ServiceNow Developer Instance
Application / Tool	Workflow automation	ServiceNow Flow Designer
Service Catalog	Standard Laptop request	Standard Laptop Catalog Item
Data / Records	Request and task information	Requested Item, Approval and Catalog Task records
Development Environment	Configuration and testing	ServiceNow web interface
Documentation / Version Control	Project documentation and files	GitHub
