

Problem-Solution Fit Canvas

Team ID: SWTID-2026-8434

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 5 Marks

1. Customer Segment [CS]

- Employees who require a Standard Laptop for their work.
- Approvers who review and approve laptop requests.
- Hardware team members who configure the requested laptops.

2. Problems / Pains + Its Frequency [PR]

- Standard Laptop requests require processing after approval.
- Catalog Tasks may need to be created and assigned manually.
- Manual task creation and assignment can cause delays and errors.
- This problem can occur whenever a Standard Laptop request is submitted and approved.

3. Triggers to Act [TR]

- An employee needs a Standard Laptop for work.
- A Standard Laptop request is submitted through the Service Catalog.
- The request receives approval and needs to move to the Hardware team.

4. Emotions Before / After [EM]

Before:

- Employee may feel uncertain about when the request will be processed.
- Hardware team may experience concern about delays or manual task handling.

After:

- Employee gets a more consistent request-processing experience.
- Hardware team receives the required task through the automated workflow.
- Users can have better visibility of the request and task status.

5. Available Solutions – Pros & Cons [AS]

Available Solution: Manual processing of approved laptop requests.

Pros:

- Simple to perform for individual requests.
- Does not require an automated workflow.

Cons:

- Requires manual task creation.
- Requires manual assignment to the Hardware team.
- Can result in delays or manual errors.

6. Customer Limitations [CL]

- The process should work within the existing ServiceNow environment.
- Users should follow the available Service Catalog and approval process.
- The Hardware team needs appropriate access to handle Catalog Tasks.
- The solution should avoid unnecessary manual steps.

7. Behavior + Its Intensity [BE]

- Employee submits a Standard Laptop request.
- Approver reviews and approves the request.
- Hardware team processes the laptop configuration task.
- This behavior occurs whenever a Standard Laptop is requested and approved.

8. Channels of Behavior [CH]**Online:**

- ServiceNow Service Catalog
- Requested Item
- Approval records
- Catalog Tasks
- Flow Designer

Offline:

- Hardware team laptop configuration and preparation.

9. Problem Root / Cause [RC]

The root cause is the need to manually create and assign a Catalog Task after a Standard Laptop request is approved. This creates additional manual effort and can lead to delays or errors in processing.

10. Your Solution [SL]

Standard Laptop Procurement Automation using ServiceNow Flow Designer

The solution uses **Flow Designer** to automate the process after a Standard Laptop request is approved. The Flow creates a **Catalog Task**, sets the required task details, and assigns it to the **Hardware** team. This creates a consistent flow from **request → approval → Catalog Task creation → Hardware team processing**.
