

Solution Architecture

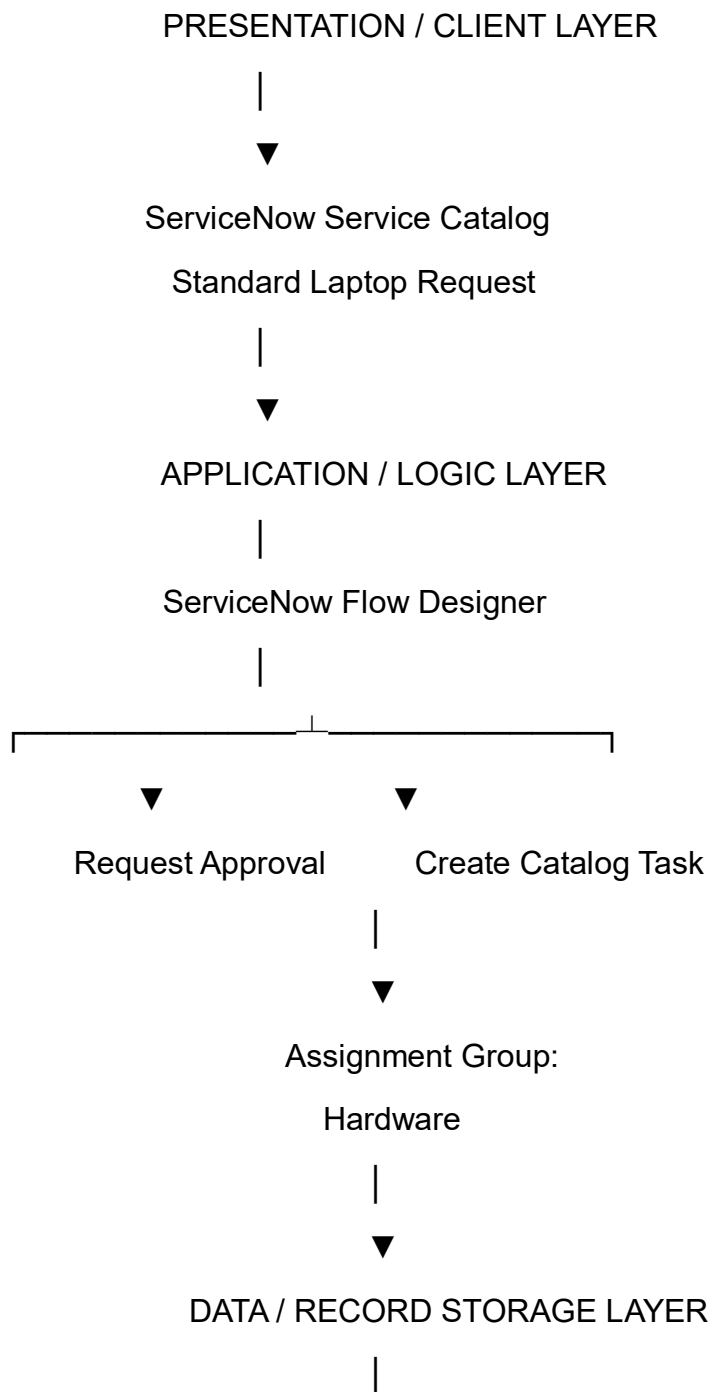

Team ID: SWTID-2026-8434

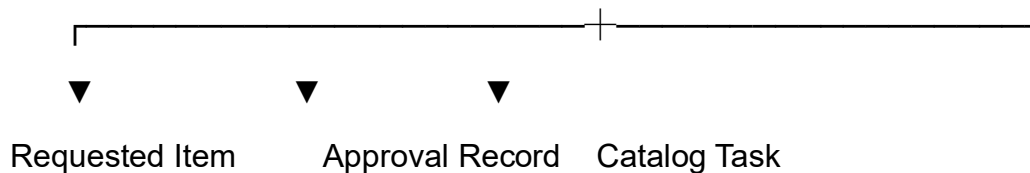

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 5 Marks

Solution Architecture Diagram

You can draw the architecture in this flow:

Layer Details

1. Presentation / Client Layer

Technology: ServiceNow Service Catalog

Purpose: Allows employees to submit the Standard Laptop request and view the request-related information.

2. Application / Logic Layer

Technology: ServiceNow Flow Designer

Purpose: Handles the automation logic. After the Standard Laptop request is approved, the Flow creates a Catalog Task and assigns it to the Hardware team.

3. Data / Record Storage Layer

Technology: ServiceNow Platform Database

Purpose: Stores the Requested Item, approval information, and Catalog Task records used during the procurement workflow.

Component Description Table

The template specifically asks for the component name, its role, and the technologies used.

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the interface for employees to submit and track Standard Laptop requests.	ServiceNow Service Catalog
Application / Logic Layer	Automates the laptop procurement workflow after the request is approved.	ServiceNow Flow Designer
Request & Approval	Stores the requested item and handles the approval process before task creation.	ServiceNow Requested Item, Approval
Catalog Task	Represents the task generated for laptop configuration and assigns it to the Hardware team.	ServiceNow Catalog Task

Component Name	Description / Role in Architecture	Technologies Used
Database / Data Layer	Stores request, approval, and task-related records used by the workflow.	ServiceNow Platform Database

Simple Architecture Flow

Employee → Service Catalog → Standard Laptop Request → Approval → Flow Designer → Catalog Task → Hardware Team
