

PROJECT EXECUTABLE FILES

Team ID: SWTID-2026-8434

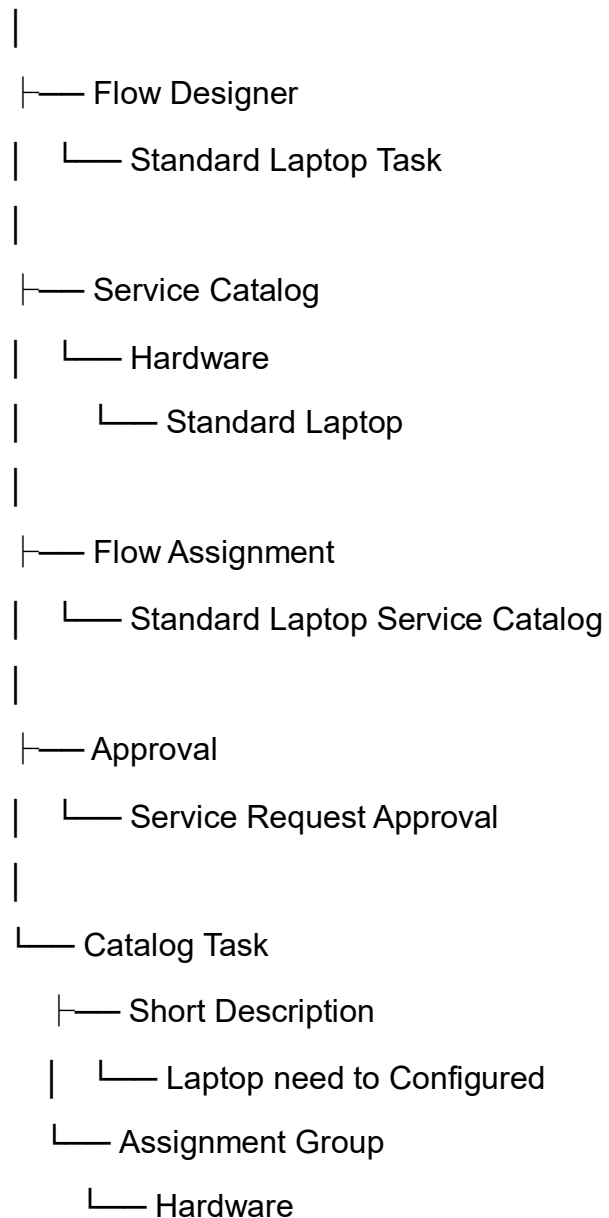

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with

Step 1: File / Folder Structure

Since this project is implemented in ServiceNow Flow Designer, there is no conventional source-code folder structure.

Project Structure

ServiceNow Project

The project documentation specifies the Flow name as “Standard Laptop Task”, with a Service Catalog trigger and a Create Catalog Task action.

Step 2: Run Instructions

Step 1 – Open ServiceNow

Log in to the ServiceNow instance using the provided credentials.

Step 2 – Open Service Catalog

1. Click **All**.
2. Search for **Service Catalog**.
3. Open **Service Catalog**.
4. Select **Hardware**.
5. Select **Standard Laptop**.

Step 3 – Place the Request

Click **Order Now** to place the Standard Laptop request.

Step 4 – Approve the Request

1. Open the submitted request.
2. Open the **Approvers** section.
3. Approve the request.

Step 5 – Verify the Requested Item

1. Open the **Requested Item** record.
2. Scroll to the **Catalog Tasks** section.
3. Open the generated Catalog Task.

Step 6 – Verify Automation

Verify that:

- The Catalog Task has been created.
- Short Description is “**Laptop need to Configured**”.
- Assignment Group is **Hardware**.
- The task status has been updated correctly.

The project documentation specifically describes checking the Catalog Task to verify the updated status, short description and assigned group.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	ServiceNow instance access is required to run the project	Provide valid ServiceNow demo credentials
2	Project depends on ServiceNow Flow Designer	Run the project within the configured ServiceNow instance
3	Actual performance-test results are not included in the project documentation	Execute performance testing and attach the results
4	Deployment URL and demo credentials are not specified in the supplied documents	To be provided by the project team

Project Execution Summary

The project automates the Standard Laptop procurement workflow using ServiceNow Flow Designer. Once the Standard Laptop request is approved, the flow creates a Catalog Task and assigns it to the Hardware group for configuration.

This automation reduces manual intervention and supports timely laptop configuration within the IT procurement process.
